The examiner regrets that upon further examination, the following two issues need to be addressed. Accordingly, this action is being made non-final.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The colors of claim 88 and the weight scale number of claim 89 lack support in the specification. Since they were in an original claim, they may be added to the specification without introducing new matter.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 40-50 and 83-89 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 40-43 and 83-84 refer to creating a matrix. It is unclear whether this matrix is in addition to the matrices recited in claim 1, or if it is supposed to refer to one of the matrices in claim 1. Clarification is required.

Claims 1-93 define over the art of record in that none of the art determines the two balanced positions in the two matrices, as claimed.
